Altopascio, July 2009

TO WHOM IT MAY CONCERN

Subj: SAMPI SpA Presentation

1. Company Profile

Sampi with its news offices and factory inaugurated in June 2004, is located in the city of Altopascio, in the heart of Tuscany, a region in central Italy. For over 60 years, thanks to an aggressive and dynamic management, the company became an international leader known for its products which provide a high standard of quality, safety and reliability.

The Company went into business in 1937 in Lucca dealing with mineral oils and additives and enjoying a very fast growth with a wide distribution network. After World War 2 with the reconstruction plan of Italy, Sampi increased its activity entering in the forecourt business. In the sixties, with the introduction of new regulations in the distribution of fuels, the management expanded its scope to include pumps and meters: first becoming distributor and then, with the fast growing demand, setting up a workshop to manufacture positive displacement flow meters. The Company quickly became a leader in the Italian market and in the eighties expanded its activity internationally especially in Europe and Africa.

Over the years Sampi also diversified its product line by developing systems based on its core products and in the nineties introduced electronic products for terminal and tank truck automation.

Since January 2002 Sampi joined the IDEX team of Companies. IDEX is a leader in the manufacture of a broad range of pump products, dispensing equipment and other engineered technologies. Maintaining a theme of leadership, IDEX delivers Innovation, Diversity and EXcellence to thousands of valued customers around the world.

Our main product lines include:

- Positive Displacement flow-meters for petroleum and chemical liquids, systems including high speed dispensers for many applications such as marinas, military vehicles, small aircraft, trains.
- High Speed Dispensers for marinas, military vehicles, trains, aircraft.
- Tank Trucks Metering Systems with electronic registers.
- Engineered Solutions such as pumping and metering systems, loading/unloading racks, chemical injection/dosing skids, turn key solutions
- Terminal automation systems.

Today Sampi is proud to bring to the market high quality products with the most efficient performance. Sampi is ISO9001 certified and has recently certified all its products according to the most recent PED Directive, implemented in May 2002 in the EEC stationary installations.

2. IDEX Corporation Profile

IDEX Corporation (NYSE: IEX) is the world leader in fluid-handling technologies for positive displacement pumps, dispensing equipment and other industrial products including clamping devices and rescue tools. IDEX's business units are organized into four groups: Fluid & Metering Technologies, Health & Science Technologies, Dispensing Equipment and Fire & Safety/Diversified Products. Sampi is part of Liquid Controls Group, an IDEX Fluid & Metering Unit.

IDEX Fluid & Metering Businesses

Liquid Controls Group

(Liquid Controls / SAMPI / Corken / Faure Herman / Sponsler / Toptech Systems)

Electronic registration and control systems; terminal automation software and electronics; mobile, point-of-sale data management systems; compressors; pumps and flow meters (positive displacement, turbine, ultrasonic, electromagnetic and coriolis mass) used in refined fuels, alternative fuels, liquefied petroleum gas, compressed & liquefied natural gas, aviation fuels, cryogenics, chemical and many other markets which require precision fluid-handling and metering.

ADS LLC

(ADS Environmental Services / Hydra-Stop / Accusonic / IETG)

Flow monitoring hardware, software, and services for wastewater collections, treatment systems, hydro-electric, and other open and closed channel applications including ultrasonic Doppler technology, transit-time, and cross correlation. Water distribution services including leak detection, large diameter leak detection, water audits, district measurements, valve maintenance, asset assessment, and non-revenue water recovery. Line stopping, line tapping, and valve insertion equipment and contract services for under pressure installations without system shutdown.

Banjo Corporation

Valves, pipe fittings, flanges, centrifugal pumps, cam lever couplings, strainers, filters, Intermediate Bulk Container valves and tank accessories targeting a range of agricultural and industrial applications.

iPEK Spezial-TV

A leading provider of systems focused on infrastructure analysis, specifically waste water collection systems. iPEK, renowned for its quality and versatility, is a leading developer of remote controlled systems for infrastructure inspection.

Sanitary Group

(Quadro Engineering / Wright Flow Technologies / Knight)

Fine milling, emulsification and special-handling equipment and integrated systems used on liquid and solid particulates for laboratory, pilot phase and production-scale processing within the pharmaceutical and bio-pharmaceutical markets, as well as the food & beverage, personal care and fine chemicals markets. Circumferential piston, centrifugal, rotary lobe and air-operated diaphragm pumps and flow meters used in OEM equipment and process applications within the food & beverage, personal care, and pharmaceutical markets and a growing range of other sterile/sanitary applications.

Pulsafeeder

Precision diaphragm metering pumps, alloy and non-metallic gear pumps, centrifugal pumps, special purpose rotary pumps, peristaltic pumps, transfer pumps, engineered system solutions, electronic controls and dispensing equipment used in a wide range of applications from municipal water and wastewater to power generation to food & beverage to commercial laundry and dishwashing.

RICHTER Chemie-Technik

Leading provider of premium quality lines pumps, valves and control equipment for the chemical, fine chemical and pharmaceutical industries. Richter's corrosion resistant fluoroplastic lined products offer superior solutions for demanding applications in the process industry.

Viking Pump

Rotary internal gear, external gear, vane and rotary lobe pumps; custom-engineered OEM pumps; strainers; gear reducers; engineered pump systems and related electronic controls for diverse application in industries ranging from chemical processing, alternative fuels, and paints & coatings to construction, transportation, renewable energy and many others.

Warren Rupp / Versa-Matic / Blagdon

Air-operated and natural gas-operated double diaphragm pumps, high-pressure pumps and accessories, DC-powered submersible pumps and after-market replacement parts used in chemical processing, food processing, industrial maintenance, paints & coatings, inks, sealants & adhesives, ceramics, oil & gas extraction, mining and numerous other industries.

3. Countries and Markets

Within the Liquid Controls Group, SAMPI is covering the business in Europe, Middle East and Africa for the current business.

As specialist in Engineered Solutions and Packaged Systems, SAMPI is also leading the Liquid Controls Group offering their support and expertise world wide to any other IDEX Company, participating directly or in joint venture.

Main Markets/Applications covered:

- Custody Transfer skids, Bottom or Top Loading skids, Unloading Skids, Additive and/or Chemical Injection, Bulk Transfer, Terminal Systems and Automation for the Oil & Gas market.
- Fuel Unloading, Transfer, Loading, Additivation and Filtration systems for Military and Civil Aviation.
- Chemical dosing and Injection in Chemical and Petrochemical process plants
- Fuel Treatment and Chemical dosing for Power Generation.
- Chemical dosing and additivation for Water & Waste Water

4. SAMPI Main Contacts and Organization

Manufacturing Address:

Via A. Vespucci, 1 – 55011 Altopascio (Lucca, Italy)

Direct manufacturing of PD Meters and relevant accessories, Flow Computers, Pumps, Flow Control Valves and Packaged Systems.

Other equipments and/or accessories, such as turbine or ultrasonic flow meters, coriolis meters, dosing pumps, rotary pumps, etc. are manufactured in dedicated facilities in USA and Europe, part of the IDEX Corporation business units.

5. Factory and Facility

Total available area: 4155 sq.m.
(2230 sq.m. Manufacturing, 955 sq.m. Warehouse, 970 sq.m. Administrative)

Main activities and equipments:

Calibration Bench:

- Certified tank Provers, 1000 l, 2000 l, 5000 l
- Certified Master metering system
- Automatic Calibration Units for series productions
- Test Bench for Gravity Meters
- Test Rig for Pumps and Systems

Painting Facility

Painting cycles are available to cover any severe environment; customized painting cycles as per applicable specs. Also available.

Welding:

- Qualified Welders according to EN 287 and EN 9606-2

6. Certifications

SAMPI is qualified to major international quality standards:

- ISO 9001 for Quality Control
- ISO 14001 for Environmental Safety
- EC Directives for products, ATEX, PED, MID

7. Financial Info

SAMPI balances are audited and certified by international notified bodies, such as Deloitte & Touche.
